

LAUNCH

Steel Grade S355 Structural tube

Discover remarkable new options for all hollow sections in steel structures:

- More slender members
- Higher strength steel
- Cleaner connections
- Extended range of sections
- Greater economy
- Enhanced aesthetics

Our main speaker, **Professor Jeff Packer** of the University of Toronto, is a world leader in the field of tubular structures. He will explain all these exciting new developments and what it can mean for you and your business.

Who should attend?

Architects, structural engineers and designers, technologists, draughtsmen, steel fabricators, property developers, quantity surveyors and representatives of other segments of the steel industry.

CPD points:

SAIA CPD accreditation in process

Exhibits:

See for yourself what can be achieved with the new technologies.

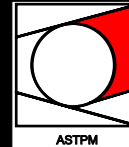

Course: design and construction of tubular structures

This course, aimed at engineers, detailers and steelwork contractors, will be presented at all venues directly after the launch.

Note to course attendees:

The Launch Breakfast forms an integral part of the course on the structural design for 355 tubes.

For more information on the course contact renee@saisc.co.za
